6G SNS IA

A Future Europe with a Reinforced Technological Leadership

Dr. Colin Willcock

6G-IA Board Chair

SNS JU Vice-chair

ETSI Board Vice-chair

The Voice of European Industry and Research for Next Generation Networks and Services

WELCOME

NetworldEurope and 6G-IA Workshop

Advanced connectivity: the essential pillar for European Competitiveness and Sovereignty

> Europe stands at a critical technological, innovation and business crossroads

> Critical role of Digital Technologies in EU competitiveness, sovereignty, and security

> Key role of connectivity infrastructures within the overall digital ecosystem

Goals of the event

> Prepare for the upcoming EU Framework Programme 10 (FP10)

> Discuss among key stakeholders
>> How the changing policy environment may affect strategic priorities?
>> How collaboration in upstream R&D&I may be reshaped?
>> How to structure downstream R&D&I to optimize take up and impact in the context of the overall digital objectives?

> Address existing challenges
>> Fragmented funding instruments
>> Limited monetization of innovations
>> Long timelines for advanced solutions
